INDEX - VOLUME 30

Acid, effect on embryonic development of salmon 511
Acid Rain, effects on growth and nodulation of legumes 379
Aldrin, levels in human milk in Hawaii 606
residues in marine organisms of Mexico 456
residues in rice paddies in Malaysia 351
Alga, effect of cresol on photosynthesis and respiration 1
effect of PCBs 191
effect of retorted-oil shale leachate 6
Aluminum, effect on survival of trout at low pH 582
Aminopropiophenone, acute oral toxicity to birds and mammals 122
Arsenic, distribution and neurochemical effects in rats 303
levels in the forest environment after thinning 309
Atrazine, effect on budding rates of green hydra 344

Benthiocarb, effect on nitrogen metabolism of fish tissue 473
Benzo anthracene, distribution in surficial sediments in Maine 530
Benzopyrene, distribution in surficial sediments in Maine 530
effect on neurotransmitter levels of fish 147
levels in raw and pan-fried croaker 65
Birds, acute oral toxicity of aminopropiophenone 122
behavioral response to contaminated drinking water 505
effect of DDE and oil on egg quality 17
effect of dietary carbofuran on activity patterns 105
effect of PCBs on courtship behavior 44
electrophoretic profiles of esterases in plasma 373
heavy metal residues in prefledgling night-herons 178
levels of mercury in a park ecosystem in Spain 544
Bromoacetonitrile, formation in rats dosed with NaOCl 394
Bromoform, formation in rats dosed with NaOCl 394

Cadmium, absorption and tissue distribution in mice 33
accumulation by four molluscs 317
binding by ligands in oyster 428
effect on germination of fern spores 559, 567
levels in liver, kidney, and muscle of Queensland cattle 588
levels in prefledgling night-herons 178
levels in snapping turtles in Minnesota 186
levels in tissues of Virginia river otters 442
pollution monitoring based on mussel activity 400
removal from water by water hyacinth 170
uptake and binding by protein in the waterflea 298
uptake by earthworms 424
Calcium, effect on survival of trout at low pH 582
Captan, identification of a metabolite in fruit crops 117
Carbaryl, drift and worker exposure during spraying of trees 223
effects on salt marsh pool algae 464
identification by a regulatory agency laboratory 93
intracellular localization and toxicity in fish cells 99
Carbofuran, effect on bobwhite activity patterns 105
Carbon Monoxide, effect on woodlice 245
Carbon Tetrachloride, column packing for gc determination 492

Chlordane, levels in human milk in Hawaii 606
residues in rice paddies in Malaysia 351
Chloroaniline, attachment to quinoidal sites of soil humus 485
Chlorobenzene, quantitative structure-toxicity relationship 80
Chloroethane, quantitative structure-toxicity relationship 80
Chloroethylene, quantitative structure-toxicity relationship 80
Chloroform, column packing for gc determination of residues 492
effect on survival, growth, and liver of fish 199
formation in rats dosed with NaOCl 394
pollution monitoring based on mussel activity 400
Chlorophenol, quantitative structure-toxicity relationship 80
Chloropicrin, column packing for gc determination of residues 492
Chlorpyrifos, effects on salt marsh pool algae 464
Chlorsulfuron, persistence in soil 365
Chromium, accumulation by four molluscs 317
effect of fish weight on uptake 331
levels in liver, kidney, and muscle of Queensland cattle 588
levels in prefledgling night-herons 178
tests for genotoxicity of tanning agents 127
Chrysene, distribution in surficial sediments in Maine 530
Cobalt, accumulation by four molluscs 317
levels in prefledgling night-herons 178
Copper, accumulation by four molluscs 317
algal assay method 448
behavioral response of mallards to contaminated water 505
binding by ligands in oyster 428
bioavailability in a freshwater-sediment system 37
effect on germination of fern spores 559, 567
levels in liver, kidney, and muscle of Queensland cattle 588
levels in prefledgling night-herons 178
levels in tissues of Virginia river otters 442
oxidative changes in erythrocytes 323
pollution monitoring based on mussel activity 400
uptake by earthworms 424
Cresol, effects on photosynthesis and respiration of Spirogyra 1
Cyanide, pollution monitoring based on mussel activity 400

Daphnia, effect of pH on toxicity of dehydroabietic acid 133
DDE, enhancement of mallard egg quality 17
DDT, concentration using bacteria and membrane filter system 253
levels in human milk in Hawaii 606
levels in Japanese adipose tissue 74
levels in raw and pan-fried croaker 65
residues in marine organisms of Mexico 456
residues in rice paddies in Malaysia 351
DEF, effect of acute exposure on trout 614
Dehydroabietic Acid, effect of pH on toxicity to fish 133
Dibromoacetic Acid, formation in rats dosed with NaOCl 394
Dibromomethane, formation in rats dosed with NaOCl 394
Dibutyl Phthalate, chemical-physical properties 152
Dichloroacetic Acid, formation in rats dosed with NaOCl 394
Dichloroacetonitrile, formation in rats dosed with NaOCl 394

Dichlorobenzene, residues in human fat and milk 595
Dieldrin, effect on budding rates of green hydra 344
levels in human milk in Hawaii 606
mortality of gray bats 214
residues in marine organisms of Mexico 456
residues in rice paddies in Malaysia 351
Diethylhexyl Phthalate, chemical-physical properties 152
Dimethylhydrazine, effect on Enterobacter cloacae 497
Diuron, effect on snail 628

Endrin, residues in marine organisms of Mexico 456
Ethylene Dibromide, column packing for gc determination 492
Ethylene Dichloride, column packing for gc determination 492

Fenitrothion, adsorption on soil and sediment 621
Fenvalerate, determination in seawater 84
Fish, content of mercury in sharks 284
content of mercury in tuna 291
effect of acidic conditions on embryonic development 511
effect of aluminum and calcium on survival at low pH 582
effect of benthiocarb on nitrogen metabolism in tissue 473
effect of benzopyrene and PCBs on neurotransmitter levels 147
effect of body weight on uptake of chromium 331
effects of chloroform and tri- and tetrachloroethylene 199
effect of DEF, methyl parathion, and triphenyl phosphate 614
effect of mercury on the reproductive cycle 24
effect of PCBs on growth and survival 50
effect of pH on toxicity of dehydroabietic acid 133
effect of sediment on osmoregulatory ability 522
histopathologic effects of aviation fuel 536
intracellular localization and toxicity of carbaryl 99
levels of benzopyrene, DDT, and PCBs 65
levels of mercury in a park ecosystem in Spain 544
levels of PCBs 58
organochlorine residue levels in Mexico 456
toxicity of Texas petroleum well brine 277
Fluometuron, effect on snail 628
Fluorene, distribution in surficial sediments in Maine 530
Fluoride, induction of haemotological changes in rabbits 388

Heptachlor Epoxide, levels in human milk in Hawaii 606
residues in marine organisms of Mexico 456
Hexachlorobenzene, levels in human milk in Hawaii 606
levels in Japanese adipose tissue 74
residues in human fat and milk 595
Hexachlorocyclohexane, levels in human milk in Hawaii 606
levels in Japanese adipose tissue 74
pollution monitoring based on mussel activity 400
residues in marine organisms of Mexico 456
residues in rice paddies in Malaysia 351
Hydrazine, effect on Enterobacter cloacae 497
Hydroquinone, response of mallards to contaminated water 505

Iron, analytical method using tetrazolium salts 337

Lead, accumulation by four molluscs 317
accumulation by pond-lily 575
chelation with DMPS and BAL 165
effect of dietary protein on locomotor activity 158
levels in liver, kidney, and muscle of Queensland cattle 588
levels in prefledgling night-herons 178
levels in tissues of Virginia river otters 442
poisoning in cattle 435
removal from water by water hyacinth 170
treatment of poisonings with chelates 552
uptake by earthworms 424

Malathion, effects on salt marsh pool algae 464
Mercury, content in sharks from Hawaiian marine waters 284
content in tuna 291
distribution in a park ecosystem in Spain 544
effect on budding rates of green hydra 344
effect on the reproductive cycle of a teleost 24
levels in liver and meat of harp seal 28
levels in liver, kidney, and muscle of Queensland cattle 588
levels in Minnesota snapping turtles 186
removal from water by water hyacinth 170
Metaldehyde, determination in workroom air 479
Methane, effect on woodlice 245
Milk, levels of organochlorine compound in Hawaii 606
residues of chlorobenzenes 595
Mirex, levels in human milk in Hawaii 606
Monomethylhydrazine, effect on Enterobacter cloacae 497
Multiresidue Pesticide Procedure 110

Naphthalene, distribution in surficial sediments in Maine 530
effect on neurotransmitter levels of fish 147
effect on respiration rates of dragonfly nymphs 269
toxicity to mysids 406
Nickel, accumulation by four molluscs 317
levels in prefledgling night-herons 178
Nitrite, acclimation of channel catfish 516
Nitrogen Dioxide, effect on woodlice 245
Nonachlor, levels in human milk in Hawaii 606

Oil, effect of retorted-oil shale leachate on alga 6
enhancement of mallard egg quality 17
histopathologic effects of aviation fuel on fish 536
toxicity of Texas well brine to estuarine fish 277
Oxychlordane, levels in human milk in Hawaii 606
Oyster, binding of Cd, Zn, and Cu by ligands 428

Parathion, effect of acute exposure on trout 614
photochemical behavior in sunlight 358
Pendimethalin, distribution in an aquatic microecosystem 239

Pentachlorobenzene, residues in human fat and milk 595
Pentachlorophenol, fate in littoral microcosms 206
pollution monitoring based on mussel activity 400
Phenanthrene, distribution in surficial sediments in Maine 530
uptake and elimination by mussel 420
Phenol, pollution monitoring based on mussel activity 400
Phenolic Compounds, methanogenesis by a bacterial consortium 261
Phenylmercury Acetate, effect on budding rates of green hydra 344
Phosphamidon, effect on carbohydrate metabolism of mussel 219
Phthalate Esters, chemical-physical properties 152
Polonium, accumulation by pond-lily 575
Polychlorinated Biphenyls, concentration using bacteria and membrane filter system 253
effect on budding rates of green hydra 344
effect on courtship behavior of dove 44
effect on growth and survival of bass 50
effect on neurotransmitter levels of fish 147
effect on phytoplankton 191
levels in fish and sediment in a Wisconsin river 58
levels in human milk in Hawaii 606
levels in Japanese adipose tissue 74
levels in Minnesota snapping turtles 186
levels in raw and pan-fried croaker 65
perchlorination to decachlorobiphenyl 600
Polycyclic Aromatic Hydrocarbons, distribution in surficial sediments in Maine 530
monitoring with fluorescence spectroscopy 413
Propoxur, effects on salt marsh pool algae 464

Radium, accumulation by pond-lily 575

Salmonella, toxicants in the leather and tannery industry 127
Selenium, levels in liver, kidney, & muscle of Queensland cattle 588
Simazine, behavioral response of mallards to contaminated water 505
Sodium Hypochlorite, reaction with stomach contents of rats 394
Soil, attachment of chloroaniline residues to soil humus 485
Sulfur Dioxide, effect on woodlice 245

2,4,5-T, effect on budding rates of green hydra 344
RNA synthesis in tumors of bean embryos 229
Temephos, effects on salt marsh pool algae 464
Tetrachlorobenzene, residues in human fat and milk 595
Tetrachloroethylene, column packing for gc determination 492
effect on survival, growth, and liver of fish 199
Toluene, pollution monitoring based on mussel activity 400
Toxaphene, effect on budding rates of green hydra 344
Triallate, identification in grain pellets 234
Trichloroacetic Acid, formation in rats dosed with NaOCl 394
Trichlorobenzene, residues in human fat and milk 595
Trichloroethylene, column packing for gc determination 492
effect on survival, growth, and liver of fish 199
pollution monitoring based on mussel activity 400
Triphenyl Phosphate, effect of acute exposure on trout 614

Uranium, accumulation by pond-lily 575

Worker Exposure, carbaryl spraying of pine trees 223

Zinc, accumulation by four molluscs 317
binding by ligands in oyster 428
effect on germination of fern spore 559, 567
levels in liver, kidney, and muscle of Queensland cattle 588
levels in prefledgling night-herons 178
levels in tissues of Virginia river otters 442
uptake by earthworms 424
